

# Release note Euphemia 9.5

## PCR Market Coupling Algorithm

2016/10/19 - Bucharest / Madrid / Oslo / Paris / Prague / Rome / Warsaw

A new release of Euphemia is scheduled to go-live for delivery day 20<sup>th</sup> October 2016.

Compared to the current E9.4 release, the differences are:

- **Explicit modelling of cumulative capacities**
- **Intuitive flow based logging**
  - Logging of intuitive bilateral exchanges;
  - Logging of shadow prices for dynamically generated intuitive FB constraints;
- **Miscellaneous**
  - Various small improvements;
- **Market time units**
  - Preparation for support of different market time units (15/30/60 minutes) for block orders and curves;
    - Note: Further changes have been implemented regarding the underlying structure of Euphemia, not visible for the user, but taking into account possible future developments in market design
