

Release note EUPHEMIA 10.2 PCR Market Coupling Algorithm

2018/06/01 Bucharest / Madrid / Oslo / Paris / Prague / Rome / Warsaw

A new release of Euphemia is scheduled to go-live for delivery day on 6 June 2018. Compared to the E10.1 release the changes are:

- **Multi-threading improvements**
 - More frequent checks against time limit to avoid late termination;
 - Enhanced strategy to sequence activation of the different threads (while using more threads enables parallel progression of different search strategies, they consume common resources, e.g. available memory bandwidth, creating bottlenecks and causing individual threads to run more slowly)
- **Third party libraries have been updated**
- **Miscellaneous**
 - Various local technical improvements;
