

Acceptance of linked block orders

New wording:

- 4.2.3 In respect of Linked Block Orders, the normal rules for activation of Block Orders in Section 4.2.2 apply. However, Linked Block Orders will be considered collectively as a group and acceptance requires that there is no loss for the collection of Block Orders being accepted. Block Orders which do not have the highest priority among the linked Block Orders will only be activated if all the Linked Block Orders with higher priority have been activated.
