## Efficient, simple, secure compliance

Nord Pool has been delivering power trading across Europe for over 20 years. To meet the ever-changing demands of the modern power market we have developed our REMIT Transaction Reporting Services delivering efficient, simple and automated reporting within **Nord Pool Markets** to help our customers meet all obligations under REMIT.

### Reporting you can trust

- Nord Pool's REMIT Transaction Reporting Services make compliance simple and straightforward.
- Access overviews and detailed reports through the Nord Pool REMIT Portal for a clear and concise record of your compliance.
- Options to use Nord Pool as your Registered Reporting Mechanism (RRM) or to use a third party RRM.
- The FREE REMIT API integrates your systems with the REMIT Transaction Reporting Services, allowing seamless, simple and secure compliance.

## Service features

### Service 1A

#### For customers using Nord Pool as their RRM

Automatic reporting directly to ACER, of orders and trades placed in Nord Pool markets. Use Nord Pool's REMIT Portal to verify acceptance of data, extract receipts and prove REMIT compliance quickly and efficiently.

### Service 1B

#### For customers using a third party RRM

Flexibility to record your own orders and trades in markets operated by Nord Pool. Third party RRMs can be given easy access to data to facilitate reporting to ACER.

The Nord Pool REMIT Portal is also available to customers using this service to review reported data and ACER receipts quickly and simply.

### REMIT API

The REMIT API is included as part of our REMIT services package. Using the API enables you to integrate your internal systems with REMIT Transaction Reporting Services facilitating easy, seamless reporting.

REMIT API makes it possible for Nord Pool to automatically report orders and transactions to ACER on behalf of customers and provides transparent and accessible reports summarising all submitted data and ACER receipts.

For customers using a third party RRM, the API makes it possible to share relevant information and facilitate smooth and efficient collaboration.

Access all API technical documentation via the **Nord Pool Developer Portal**.

**Fees<sup>1</sup>**

	Description	Fee	Remarks
<b>Service 1A</b>	Reporting of contracts traded at Nord Pool to ACER	€80/month	Total gross trading volume ≤600 GWh/year

**About Nord Pool**

Nord Pool, Europe’s leading power market, delivers efficient, simple, secure trading across Europe. The company offers day-ahead and intraday trading, clearing and settlement to customers regardless of size or location. Today 380 companies from 20 countries trade on Nord Pool’s markets. Nord Pool operates markets in the Nordic and Baltic regions, Germany and the UK, and is a Nominated Electricity Market Operator (NEMO) in 14 European countries, while also servicing power markets in Poland, Croatia and Bulgaria. In 2016 Nord Pool had a total turnover of 505 TWh traded power. The company has offices in Oslo, Stockholm, Helsinki, Tallinn and London.
